THE SINGER MANUFACTURING COMPANY

INSTRUCTIONS FOR OILING

Remove the oil gauge from the work supporting arm and pour oil into this arm until it is level with the mark on the gauge. Run the machine a few minutes, then check oil level, and if necessary, fill to mark on gauge.

Fill the oil reservoir at the right of the balance wheel.

Apply a few drops of oil to the three oil cups for the ball bearings.

When the machine is first started, put a few drops of oil in the top of the needle bar guide pin over the needle bar.

Thereafter, when the machine is in continuous use, replenish the oil supply about twice a week.

Use only "Singer Stainless Oil for High Speed Sewing Machines".
