INSTRUCTIONS FOR OILING

Use only Singer "Oil For High Speed Sewing Machines (Cloth and Leather)" for general use, or "Stainless Oil For High Speed Sewing Machines" where a stainless oil is desired.

Apply a drop or two of oil once each week to all holes marked "OIL". Remove the face plate and oil the moving parts thus uncovered. Lay the machine on its rear side and oil all oiling points in the machine bed.

A small quantity of grease should be applied to the roller-way on the under side of each of the two cams, and to the worm gear and bevel gears in the machine bed. See Form 19011 for detailed instructions.
