Index and Product line description		Pag. 2
Technical Sheet	Adjustable needle guard patent Cerliani special coatings	Pag. 2 Pag. 24/25
Item list	Sinthetic list of CM Hooks, Shuttles and Bobbin Case/Cap with some of the most popular sewing machine references	Pag. 4
Cross Reference List by Original Number	Full list of original numbers	Pag. 32

CERLIANI introduces Hooks, Bobbin cases and Shuttles exclusively of our own production. For their fabrication we guarantee the use of quality choice materials and the constant precision in each phase of manufacturing, so as to insure that each piece will function perfectly as to the smooth sliding, quietness and long durability.

Our technical expertise if requested, can be used for the design and machining of special parts for specific technical requirements. For these reasons our special attention to quality becomes guarantee of the effective economy of the products.

Product line description

	CB Shuttle	Horizontal Rotary Hook	Vertical Rotary Hook
KH Hook to use with bobbin case / cap			
	+	+	+
KP Bobbin case / Cap			
	=	=	=
KK Hook to use with bobbin case / cap complete with bobbin case / cap			
KL Complete capless hook (hook with drop-in bobbin case)			

FINE ADJUSTMENT SYSTEM OF THE NEEDLE GUARD ON VERTICAL ROTARY HOOKS

It is well known that lock stitching is created when the hook point grazes the needle, and catches the loop formed by the needle thread.

The innovative idea of the **CM Cerliani** patent produces a fine adjustment of the peripheral needle guard fastened with only two screws to the hook, without the necessity of the third screw for the mere adjustment function and thus applicable on all existing vertical hooks. Furthermore, the patented method turns out to be simpler and more economic, needing one less screw than the known system and allowing the adjustment of the needle guard directly on the sewing machine.

The needle guard, bent naturally inwards, is forced outwards by unscrewing the adjusting screw placed between the fastening screw and the point of the needle guard in correspondence with the hook point, thus obtaining the necessary adjustment without need to take off the hook.

The innovation produced by this patent allows the fitters and technical assemblers to adjust with precision the needle guard through a simple cheap and reliable operation.

CM Cerliani: we invent.... the others try to follow us!

Ask for this feature as "R" version hook

CM Cerliani special coating for HEAVY DUTY

The research made by **CM Cerliani** through the Years, has involved countless suppliers, specialists, several Italian and foreign Universities and a strict cooperation with the most important sewing machines manufacturers Worldwide.

Among the best-achieved results only those few have been selected for the commercialization, which presented the best price/performance ratio.

Further **CM Cerliani** has chosen to back diversified solutions on the basis of the different market segment requirements.

The special coating presented in the following data sheet, has been specially developed for very heavy sewing:

dry heavy sewing.		
DC 10		
glossy black coating on the hook body, gib and basket		
PROPERTIES		
- extreme high hardness (3000 HV) - very thin coating thickness (3 μm) - uniform structure		
PERFORMANCES		
- dry sewing up to 4000 stitches per minute - low friction coefficient - extremely high wear-resistance of the whole hook through coating both race and hook point - very long service life (effect is even more evident when abrasive threads are used) - proven reliability		
LUBRICATION		
- not necessary within the indicated conditions. If present, it can enhance the performances of endurance and smoothness		
APPLICATION FIELDS		
- <u>very heavy sewing</u> and in the presence of very abrasive threads - where there are problems of great wear also on the point of the hook - where dry sewing at high speed is required		

CM Cerliani: the hook technology lives here!

CM Cerliani special coating for EMBROIDERY

Since years **CM Cerliani** is engaged in constant research for new material and coatings that permit to improve further the performances of the hook.

The research made by **CM Cerliani** through the Years, has involved countless suppliers, specialists, several Italian and foreign Universities and a strict cooperation with the most important embroidery machines manufacturers Worldwide.

Among the best-achieved results only those few have been selected for the commercialization, which presented the best price/performance ratio.

Further **CM Cerliani** has chosen to back diversified solutions on the basis of the different market segment requirements.

The special coating presented in the following data sheet, has been specially developed for the embroidery field:

DC 20 glossy black coating on the basket	
PROPERTIES	
- extreme high hardness (3000 HV) - very thin coating thickness (3 µm) - layer structure	
PERFORMANCES	
- dry sewing up to 3500 stitches per minute. Peaks up to 4000 stitches per minute are possible. - low friction coefficient - high wear-resistance of the basket - long service life even with dry sewing - proven reliability	
LUBRICATION	
- not necessary within the indicated conditions. - If present, it can enhance the performances of endurance and smoothness	
APPLICATION FIELDS	
- embroidery with dry stitching for a long service life of the hook. - medium-heavy sewing with wear problems of the race and excessive increase of the play - where it is necessary to replace often the basket due to the wear	

CM Cerliani: the hook technology lives here!
