

KE-430FX

Electronic direct drive lockstitch bar tacker

BE-438FX

Electronic direct drive lockstitch button sewer

Stable thread tightening and thread trimmer when sewing from foundation to denim applications. High quality sewing will be realized for various materials.

- -Extremely low noise and vibration for operator-friendly sewing
- -Overwhelmingly superior productivity with the world's top-class cycle time
- -Stable sewing quality with Digital Tension
- -Clean sewing with semi-dry type
- -Environment-conscious

Quality & Speed

Quality & Speed

Stable thread tightening and thread trimmer when sewing from foundation to denim applications.

High quality sewing will be realized for various materials.

Beautiful Sewing with Operator-friendly Environment

Ideal thread take-up for each material, light and heavy

In addition to the recognized stability of thread tightening for heavy materials, new best suitable thread take-up is added, which can be used from light materials to medium materials. It greatly improves sewing quality for light materials.

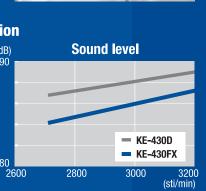

Less thread cast-off and bird nest at the sewing start

Newly added thread trimming function which cut threads after the upper shaft is stopped can steady the thread end length. Improved nipper decreases thread cast-off and bird nesting at the sewing start.

Extremely low noise and vibration for operator-friendly Sewing (dB)

Optimal design for casting and rotational mechanism by computer analysis, optimal control for direct drive motor and feeding motor reduced sewing noise and vibration greatly. It helps reduce stress and fatigue of operators and supply operator-friendly environment.

Overwhelmingly superior productivity with the world's top-class cycle time

Since a direct drive system is used, the KE-430FX boasts the world's top-class sewing speed 3,200 sti/min in shuttle hook sewing machines. Since the work clamp lift amount can be set in two steps, it contributes to enhanced productivity.

Digital tension as standard equipment

Digital Tension is equipped as standard so you can adjust the tension appropriately for the material being sewn. No more relying on individual feel, changing the thread tension can be added onto the sewing programs.

4 User-friendly Operation Panel

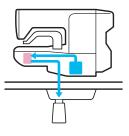

The operation panel is designed to be user-friendly and to improve the ease of operation. Sewing patterns, sewing speed and upper thread tension can be memorized as user programs. Other useful functions such as production counter and lower thread counter are available.

5 Clean Sewing with Semi-dry Type

All bar tacker and button attaching models are semi-dry type. They supply constant clean oil only to the shuttle hook, there is no concern of oil staining from needle bar area. The direct drive system, having no belt shavings can keep products clean.

Quick Change Device for Easy Work Clamp Change

The work clamp can be easily replaced by loosening the bolt and moving the work clamp arm levers.

7 Easy Maintenance

The KE-430FX provides an easy maintenance, thanks to its long life cycle of the grease.

8 High Energy Saving

New Brother-developed motor realizes high energy saving with direct drive system which minimizes loss of power transmission. The KE-430FX exercises strong sewing with less energy.

(3minutes cycle,200V)

Sewing Patterns List (KE-430FX)

The sewing patterns shown below have been preset into the sewing machine and can be selected according to specifications. (Any sewing pattern is available as long as it is within the work clamp and feed plate in size.) Use the work clamp and feed plate that match the respective sewing pattern selected.

For medium materials

^{*1} Use the optional button clamp B(S03634-101) for diameters of 20 mm or greater.

Please read instruction manual before using the machine for safety operation. -Product specifications are subject to change for improvement without notice.

^{*3} The number of sewing patterns and the number of stitches that can be recorded will vary depending on the number of stitches in each sewing pattern.

RoHS

KE-430FX and BE-438FX are compliant with the RoHS Directive(the restriction of the use of certain hazardous Compliant substances in electrical and electronic equipment) which came into effect in the EU in July 2006.

-Photographs are for illustration purpose. They may not represent actual operating conditions and may display optional parts.

Brother has established voluntary environmental standards for products and created the "Brother Green Label". KE-430FX and BE-438FX are certified as an environment-conscious sewing machine according to the "Brother Green Label" standard.
