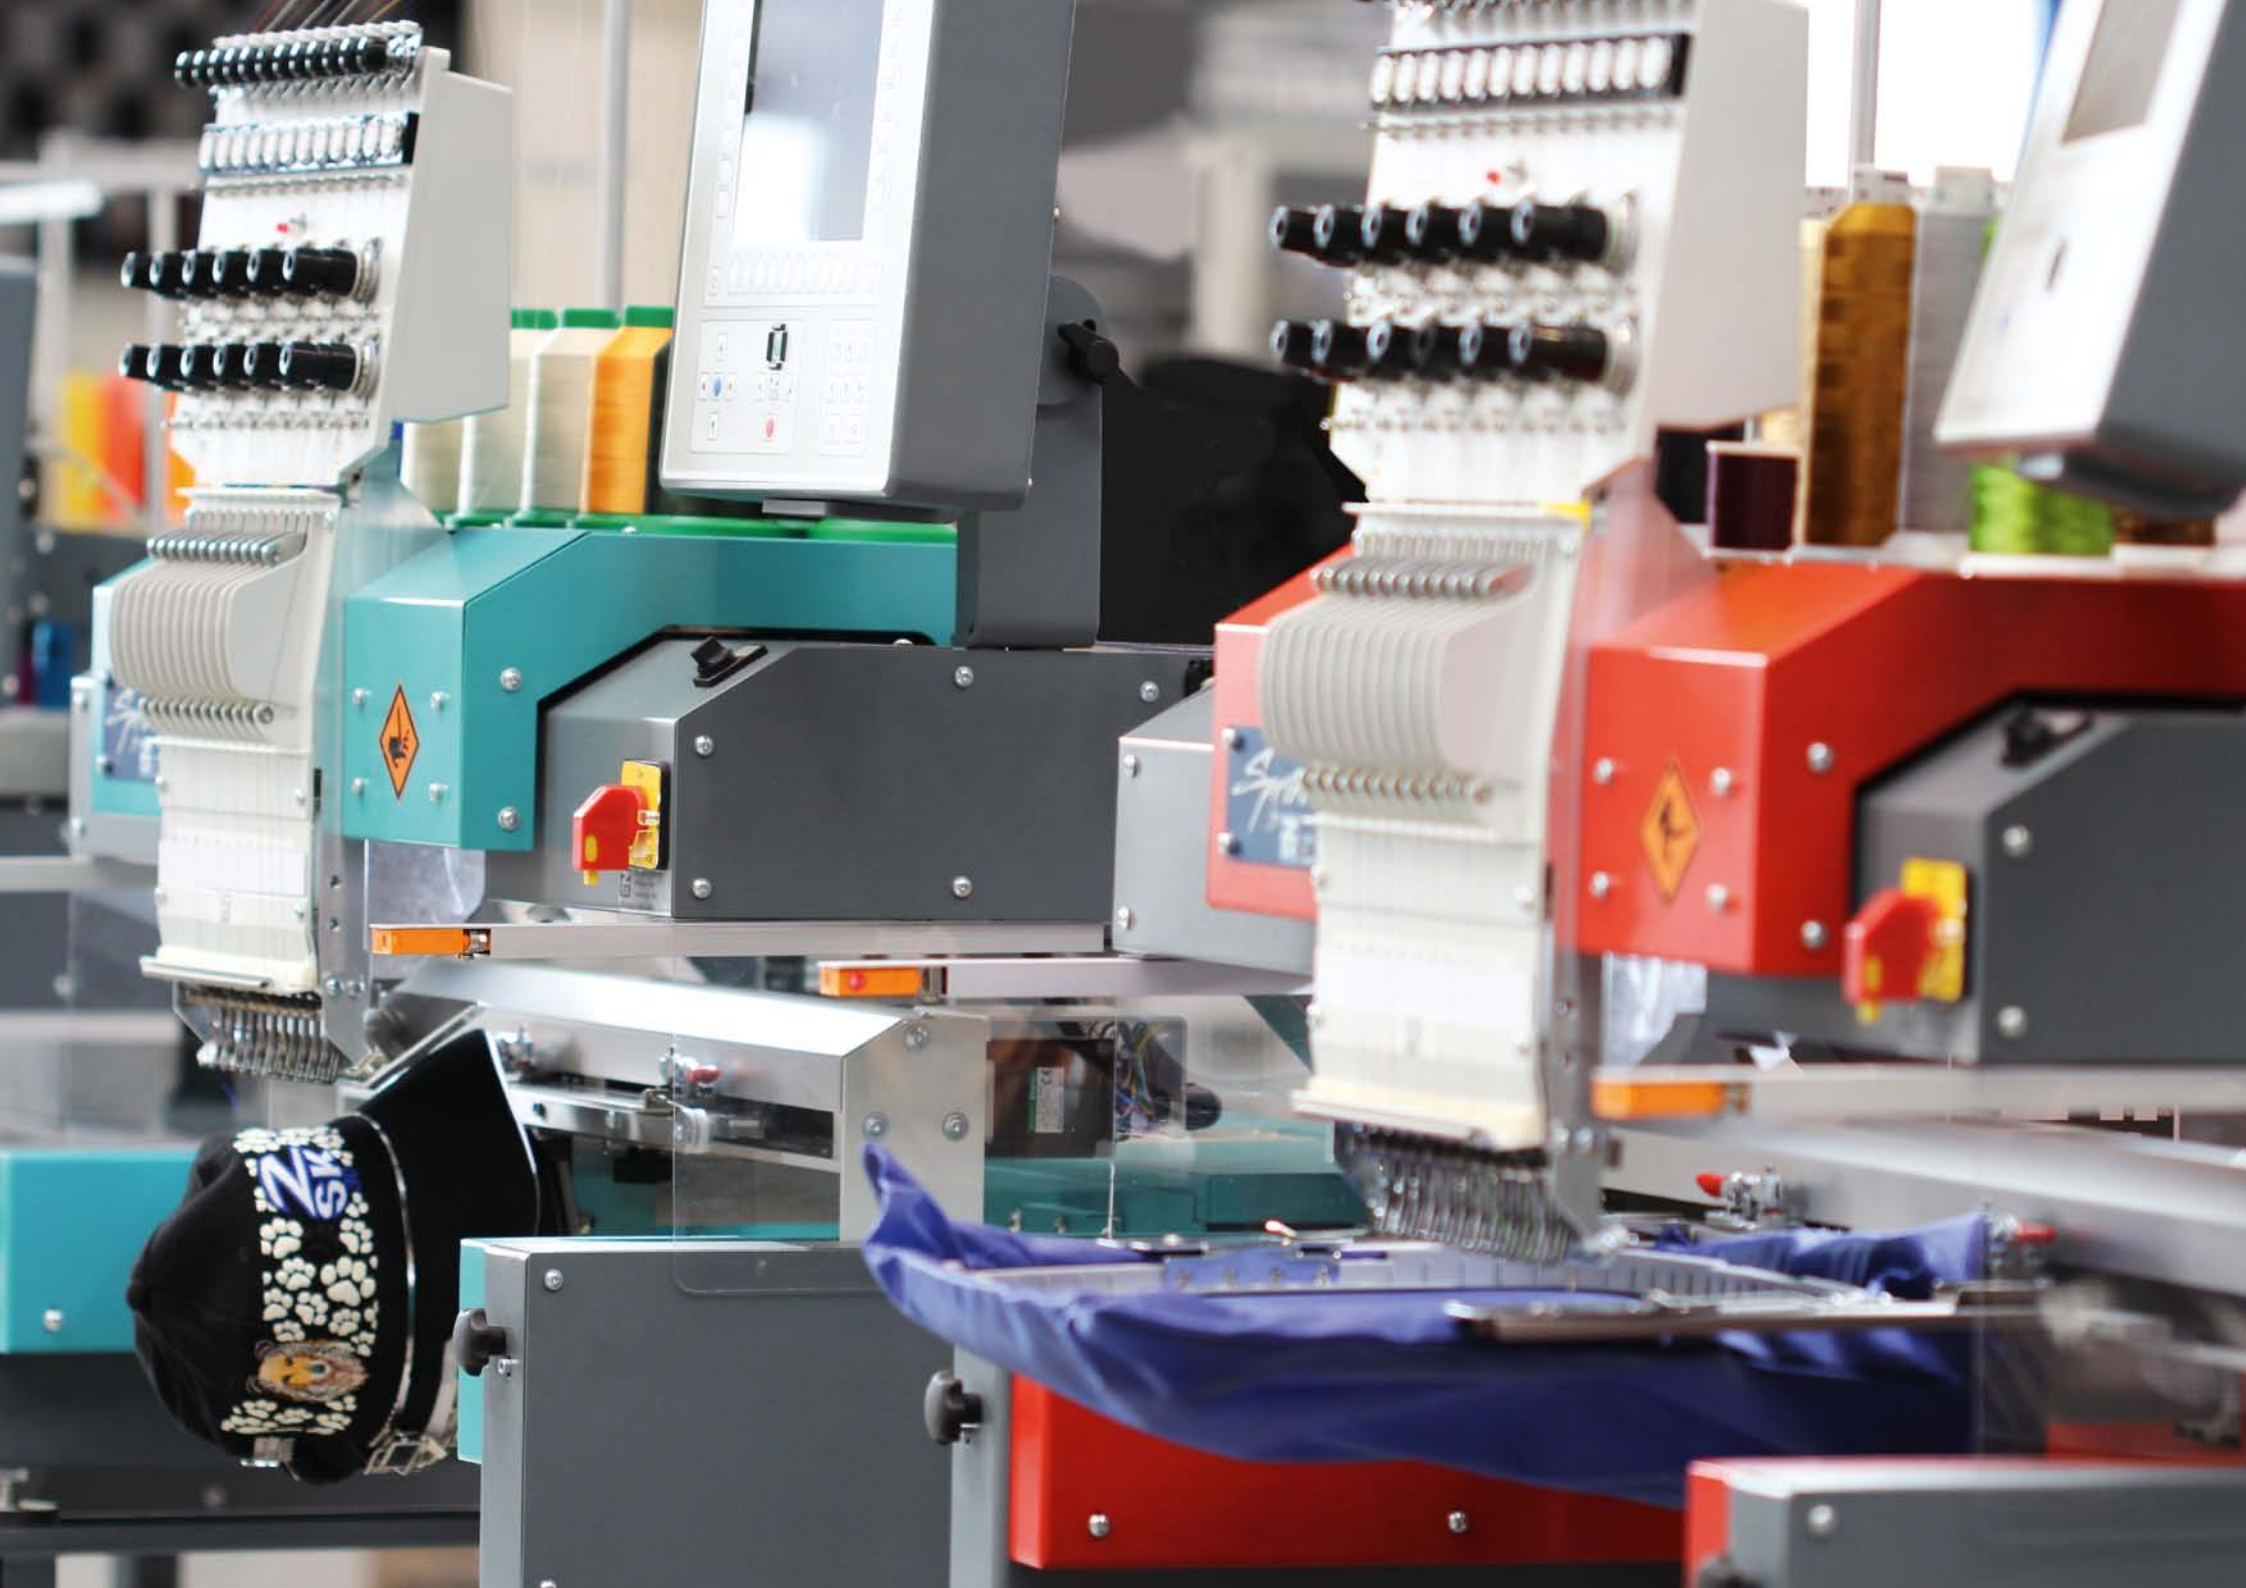
MADE IN GERMANY

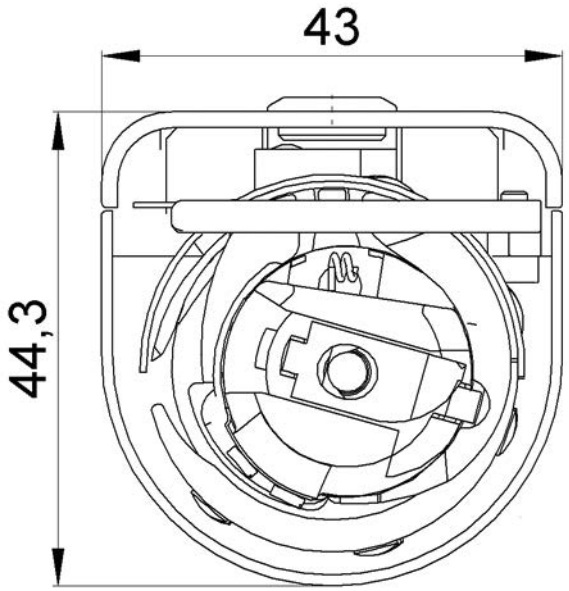
EMBROIDERY WITH PLUS FACTOR

FEATURES

- Single head - 12 needles/colours.
- Maximum speed up to 1.200 rpm.
- Tubular, cap and border frame.
- Smallest tubular arm of the embroidery industry.
- Positioning with laser support.
- Adjustable presser footer.
- Fast and easy frame exchange with optional Quick Change System.
- Large embroidery field for shoes and caps.
- Improved workflow using network functionality and barcode capability.
- Upgrade functionality with optional devices.
- Made in Germany.



SETTING NEW BENCHMARKS!



- Smallest tubular arm of the industry.
- Enables embroidery at locations that were almost impossible to reach before (i.e. shirt pockets, shoes etc.).
- Operates without a picker at the front; textiles are no longer damaged by the picker or pulled inside the hook.
- Finest clearances at the tubular arm.

THE INTERFACE

- Intuitive and logical use.
- Ready for networking.
- Accepts all common industrial embroidery codes.
- Can be operated in 14 languages.
- Storage for up to 80.000.000 stitches.
- Barcode capability.

SOFTWARE
DESIGN AND PUNCH

EPCwin 6.0

EPCwin is a ZSK developed high end software for multi-head and Schiffli embroidery.

The creation of embroidery design data for different embroidery processes still is one of the greatest challenges in professional embroidery. In this area, the unique and modular software **EPCwin** sets completely new standards regarding functionality and user friendliness.

BasePac 8.0

BasePac 8.0 is a modular software for the embroidery industry developed by ZSK's software partner GiS.

Ready to start modules for beginner like the automatic punch function ACE that produces a ready design from a picture or vector file are offered by **BasePac**. Advanced users appreciate the comprehensive options which supports tasks from Monogram, Braille embroidery up to editing Schiffli functions.

SOFTWARE

CHANCES AND OPPORTUNITIES

MY.ZSK
PLANT INFORMATION MANAGEMENT SYSTEM

MY.ZSK is a system to register, manage and visualise the operating data of connected ZSK embroidery machines.

MY.ZSK offers a fast and easy overview of the major performance data of the ZSK embroidery machines of a company and their operators online.

The data registered and visualised by **MY.ZSK** are always up-to-date. Anomalies can be recognized faster and sources of error can be resolved early.

Helpful functions related to the areas of *Recording & Management*, *Analysis & Report* and *Alerts* inform about the current state of your working capital and support the options of economically advantageous strategies and activities.

CLICKSTYLE

CLICKSTYLE **- The complete solution for embroidery workshops that want to successfully use the Internet as a new distribution channel.**

CLICKSTYLE closes the gap between online shop and embroidery by automating the production process - from the individual online design by your customer to production processing in your embroidery.

From a starter package „out-of-the-box" to the „plug-in" -solution for existing online shops - **CLICK**STYLE has the perfect solution for every embroidery workshop!

For more information about **CLICK**STYLE and the opportunities the personalization of embroidery online provides please visit our partner website www.clickstyle.com
